

uFetti Shooter

uFetti Shooter is a type of new confetti/streamer shooter working with compressed air, equipped with built-in air compressor and battery (CA12) makes it super easier for stadium applications, together with SHOWVEN PyroSlave series firing system to achieve non interference wireless control, no DMX or power cable are needed. For faster pressurize of the tank, we reserve the external air coupling connector so that operator can use their own air compressor to fill the tank. To meet different output volume request, we developed two models uFetti Shooter CA12 and CA36 with different output capacity.
